Industrial Generators

Dynamis Power offers a complete line of generators suitable for all applications : **both residential and industrial.**

About Us

Dynamis Power Solutions, a brand of the NETIS Group, offers reliable and high-performance energy solutions tailored to the needs of many sectors.

With over 15 years of experience, the Dynamis brand operates in 19 African countries, where it has built a reputation for excellence in the deployment of high-quality power supply equipment.

Its unique positioning combines technical expertise with a customer-focused approach, offering a customized solution for every project that guarantees a continuous and secure power supply, even in the most demanding environments.

Backed by the NETIS Group's expertise in telecommunications and energy, Dynamis positions itself as a trusted partner for industries, telecom operators, local governments, and businesses seeking power and reliability.

Technical Expertise

From analysis to installation: comprehensive and expert support

Dynamis draws on proven technical expertise and a team of qualified professionals to design and integrate state-of-the-art energy systems. Our generator sets are equipped with high-quality components from the leading brands, reflecting our commitment to maximum reliability.

We are committed to a rigorous quality approach, because the reliability of your power supply must never be left to chance.
Our processes are ISO 9001 certified, our equipment bears the CE mark, and we adhere to the strictest standards in Health, Safety, and Environment (HSE).

At Dynamis, every solution we deliver reflects our commitment to quality, safety, and performance.

Thanks to a team of multidisciplinary experts, Dynamis manages the entire value chain—from assessing your energy needs to on-site installation—and provides comprehensive technical support.

- Team of multidisciplinary experts
- Management of the entire value chain:
  - From assessing energy needs
  - On-site installation
- Comprehensive technical support.

Our Line of Generators

Dynamis offers a complete line of generators suitable for all applications, from residential to industrial.

Residential, industrial, power ranges, customization options.

- **Residential Generators:** Compact, quiet, and economical, our residential generators are the ideal solution for ensuring uninterrupted power in homes, small businesses, and office buildings.
  Their compact design and simplified installation ensure quick and discreet integration, even in the most confined spaces.

- **Industrial Generators:** Powerful, robust, and durable, our industrial generators are designed to meet the challenges of the most demanding environments: telecommunications, mining, construction, hospitals, factories, and much more.
  Available in stationary or mobile versions, they cover a wide power range from 5 to 4,000 kVA, ensuring a continuous and reliable power supply regardless of operating conditions.

Solutions for All Environments

All of our generators are equipped with engines from leading, well-known brands such as Baudouin, Perkins, SDEC, Cummins, Deutz, and Doosan Infracore—a guarantee of reliability and performance—and comply with international standards (ISO 9001 certification, CE marking).

They offer long-lasting performance, optimized fuel consumption, and simplified maintenance to reduce your operating costs.

We also offer tropicalized versions, specially designed to withstand hot and humid climates. And because every project is unique, we develop custom solutions tailored to your space, noise, or mobility constraints.

Thanks to their proven reliability and adaptability, Dynamis generators ensure a continuous and secure power supply for all sectors. Reliable, certified generators tailored to your requirements.

Dynamis Webnet & Telemetry

Smart Monitoring for Uninterrupted Power

Dynamis Webnet, a remote monitoring system from Dynamis Power Solutions.

This platform lets you monitor the operating status of your generators in real time, no matter where you are. Thanks to built-in telemetry, you maintain full control over your equipment with ease. This allows you to:

- Access technical data (fuel level, engine temperature, voltage, frequency, etc.).
- Receive automatic alerts in the event of an anomaly (overheating, failure, low level, etc.).
- Initiate certain actions remotely, such as shutting down or restarting the machine.
- Schedule preventive maintenance based on operating hours.

Dynamis Webnet ensures continuous operation of your equipment while reducing service costs and guaranteeing reliable and secure power generation.

It's the ideal solution for remote sites, multi-site installations, or any company seeking centralized and proactive monitoring of its generator fleet.

Hybrid Solutions & Solar Energy

Solar and thermal energy combined for an uninterrupted power supply

Dynamis offers smart hybrid systems that combine solar panels and generators to provide a continuous, optimized, and eco-friendly power supply.

- During the day, solar energy covers electricity needs.
- When solar production becomes insufficient (due to weather, the end of the day, peak demand, etc.), the system automatically switches to a Dynamis generator without any interruption.
- This seamless transition ensures a continuous power supply while reducing fuel consumption and, consequently, the carbon footprint.

An ideal solution for businesses, remote sites, or any organization seeking to reduce energy costs while ensuring uninterrupted power generation.
The hybrid approach ensures greater reliability, fuel savings, and seamless integration of renewable energy sources.

Customer Benefits & Advantages

Every Dynamis solution is designed to meet your on-site requirements

Every Dynamis Power Solutions solution is designed to optimize your operations and ensure your peace of mind.

Dynamis solutions offer:

- Guaranteed service continuity
- Safety and protection of facilities
- Increased productivity in the field
- Enhanced environmental commitment
- Comfort and independence for users
- Reduced operating costs

Why Choose Dynamis?

Innovation, flexibility, and support: the Dynamis commitment

Dynamis stands out for:

01
Proven expertise and continuous innovation

02
A comprehensive range of energy solutions

03
Certified products that comply with international standards

04
Customized solutions and a high degree of flexibility

05
Responsive 24/7 customer support

06
Excellent cost-effectiveness

When you choose Dynamis, you're choosing reliability, innovation, and support

DYNAMIS
POWER SOLUTIONS BY NETIS

Spare Parts & Local Availability

Responsiveness, Authenticity, and Optimization of Your Operations

Dynamis ensures the continuity of your operations through a rigorous spare parts inventory policy.

At DYNAMIS, we are authorized distributors of genuine parts for the industry's leading brands, such as Perkins, Doosan, Deutz, and SDEC

Our regional presence allows for maximum responsiveness in the event of maintenance or breakdowns. Our technical teams can respond quickly with the right parts, reducing downtime for your equipment.

Thanks to this well-managed logistics system, Dynamis guarantees rapid availability and optimized maintenance costs for all its professional and institutional customers.

Our Commitment

- 100% Authentic Parts
- Qualified Technicians at Your Service
- Locally Available Inventory

Bring your energy projects to life.

Our team supports you in more than 15 countries, from planning to implementation.
