NETIS Group your Trusted Telecom & Energy Partner

Empowering African Businesses with Sustainable Solutions

NETIS Group is a leading provider of integrated energy & telecommunication infrastructure solutions, supporting the growing demand for sustainable and reliable power across Africa.

Building on 17 years of experience in telecommunications and energy, we design, deploy, and maintain high-performance solar and hybrid energy systems that enable businesses and communities to operate with greater resilience and efficiency.

Our expertise spans the entire project lifecycle, from engineering and procurement to installation and long-term maintenance, delivering customised solutions that reduce operational costs, minimise environmental impact, and ensure uninterrupted power supply.

By combining innovation, technical expertise, and local execution capabilities, NETIS is committed to accelerating the energy transition and building a more connected and sustainable future.

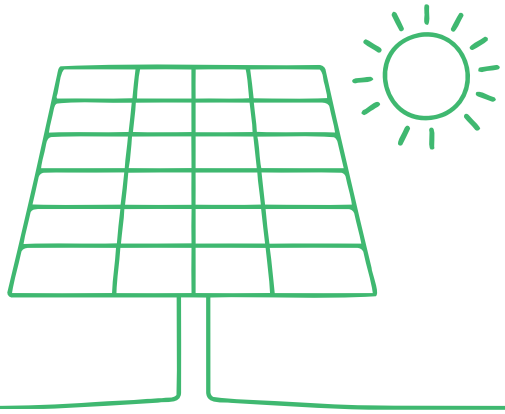

Delivering the Future by Embracing Technology and Partnership

Energy

As experts in photovoltaic installations, comprehensive and reliable solar solutions are delivered, carefully tailored to meet specific energy needs and operational contexts. The approach covers the full lifecycle of solar photovoltaic plant development, ensuring performance, efficiency, and long-term sustainability at every stage.

Telecommunication

NETIS Telecom delivers end-to-end passive telecom infrastructure solutions, ensuring seamless execution across the full project lifecycle. From initial engineering and detailed design to deployment, integration, and final commissioning, each stage is managed with technical rigor and operational precision.

Using the most advanced technologies to design your solar system

Simplifying your transition to solar energy with our streamlined process

Engineering

We work closely with our clients to design a solar system that is tailored to their specific needs. Our team of engineers uses advanced tools and software to analyze factors such as the building's orientation, shading, and energy consumption patterns to ensure that the solar system is optimized for maximum efficiency. We also take into account any local regulations and requirements to ensure that the system is compliant with all relevant codes and standards.

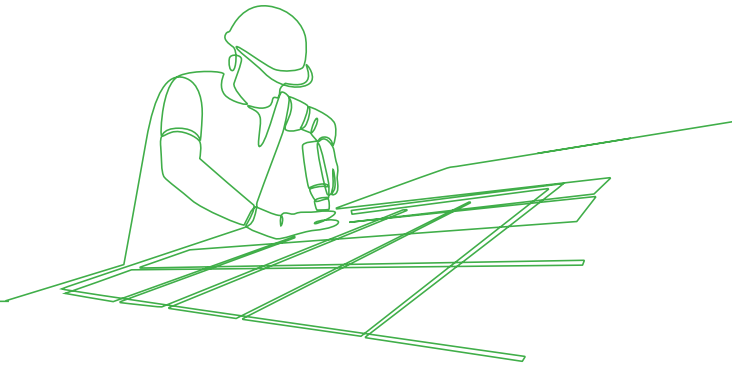

Installation

Our team of experienced installers works quickly and efficiently to install the solar panels, inverters, and other components of the system. We take great care to ensure that the installation is done correctly and safely, following all relevant safety codes and standards. Once the installation is complete, we perform a thorough inspection to ensure that everything is working as intended.

Maintenance

Our Remote Monitoring System (RMS) allows us to monitor the performance of the solar system in real-time, identifying any potential issues before they become major problems. We also offer regular maintenance services such as cleaning, inspections, and repairs as needed to ensure that the system continues to perform at its best over time. Our goal is to help our clients get the most out of their solar systems, maximizing their energy savings and reducing their carbon footprint.

Offering a wide range of solar panels to meet the specific requirements of our clients.

Rooftop Solar

Engineered for performance and built for durability, our rooftop solar solutions combine advanced photovoltaic technology with NETIS' expertise in energy infrastructure to deliver reliable, high-efficiency systems that generate long-term economic and environmental value.

Flexibility | Customizable | Increased efficiency | Easy maintenance

Solar carports

Our solar carports are available in a range of sizes and configurations to meet the specific needs of our clients. We use high-quality materials and components to ensure that our solar carports are built to last, and our team of experts will work with you to design a carport that fit the size and shape of your parking lot.

Flexibility | Customizable | Increased efficiency | Easy maintenance

Ground-Mounted Solar Panels

These panels are mounted on a frame and installed directly on the ground, providing a stable and secure foundation for the solar system. We offer a range of ground-mounted solar panels to meet the needs of our clients, including fixed-tilt and single-axis tracking systems.

Flexibility | Customizable | Increased efficiency | Easy maintenance

Your business partner in achieving maximum energy independence.

Optimizing your energy usage and reducing your carbon footprint with our premium solarization solutions.

Solar Project Development & Engineering

Feasibility studies, engineering, and project supervision of solar photovoltaic plants.

Project Financing & Subsidy Support

Support in financing and subsidy applications with partner organizations.

Electromechanical Supply & Installation

Supply and installation of mechanical and electrical equipment.

Solar Play Solution

Intelligent supervision of installations through our Solar Play solution.

NETIS Group delivers advanced solar energy solutions tailored to the needs of commercial and industrial businesses, helping them achieve greater energy efficiency, operational resilience, and long-term cost savings.

Our self-consumption solutions enable clients to generate and consume their own clean energy on-site, reducing dependence on the grid and protecting against rising energy costs. For enhanced reliability and energy security, we also provide integrated solar-plus-storage systems that ensure a stable power supply and optimise energy management.

From design and installation to operation and maintenance, NETIS offers end-to-end, customised solutions that empower businesses to reduce their carbon footprint, strengthen energy independence, and build a more sustainable and competitive future.

Providing affordable solar solutions that are built to last.

At NETIS Group, we offer solarization solutions that are a smart investment for businesses looking to save money on energy costs and reduce their carbon footprint. Our solarization solutions are designed to be affordable, long-lasting, and low maintenance, we help businesses to achieve their sustainability goals while also improving their bottom line. With NETIS Group, you can trust that your solarization investment will pay off for years to come.

Premium quality

Experience premium quality with our innovative designs that have been rigorously tested in the field for both homes and businesses to ensure that they meet the highest standards of efficiency, durability, and reliability.

24/7 energy

Experience uninterrupted energy with our reliable systems that provide 24/7 power. With our exceptional After-Sales- Services and our commitment to keeping customers connected, you can rely on us for continuous support.

The local touch

Experience personalized service with our local touch. Our call centers are strategically located in customer regions, providing support. Making the process of resolving any issues or concerns a breeze.

Invest with Confidence: Long-Term Guarantee and Unmatched Customer Support

Our commitment goes beyond project delivery. We build long-term partnerships by ensuring the reliability, performance, and longevity of every solution we deploy.

Backed by comprehensive warranty coverage and dedicated after-sales support, NETIS provides the confidence that your energy infrastructure will continue to operate at peak performance, protecting your investment and ensuring business continuity for years to come.
